## WORK EXPERIENCE

**2018-03-01 TILL TODAY**

### Software Architect at Emploitic SPA.:

Emploitic.com is a start-up based in Algiers (Algeria), recently launched two new products for the African continent Novojob.com and Talenteo.com

- Design future architecture, using containerized MicroServices (Docker/Kubernetes), communicating using REST, GRPC & PROTOBUF.

- Prepare the rewrite of existing PHP services in Golang.

**2015-04-01 TILL 2018-03-01**

### Lead Developer at Emploitic SPA.:

- Prepare the guidelines and lead the introduction and application of DevOps practices in the development process.

- Prepare for the switch to a fully automated deployment pipeline.

- Implemented the automated deployment of our 3 products.

- Design and implementation of Talenteo. REST API v2 using DDD patterns.

- Migration of our Java based functional test to Ruby, using cucumber.

- Prepare for the migration of our product's front-end to a single page application.

- Prepare for the switch of our products backend to a microservices architecture.

2013-02-01 TILL 2015-04-01

### Lead Front-End Developer at Emploitic SARL:

- Code reviews.
- Manage and prioritize Front-End tasks and stories.
- Initiated 3 internal Ruby projects used enhance the developer experience allowing for using our functional tests written in (Java/Cucumber) on the CI and developer machine with simple commands.
- Designed the architecture and configuration of the company's CI platform for our products, with Gitlab (in-promise) as the CVS.
- Configured and installed the entire CI platform hosted in multiple local/remote CoreOs/Ubuntu machines, backed by a total of 14 CI services.

2013-02-01 TILL 2015-04-01

### Front-End Developer at [Emploitic SARL](#):

- Development of a single app multi-CV editing application using EmberJS, with a custom simplified Data layer (before Ember-Data v1 was released).
- Facebook single page job searching application using jquery, api backed by php.
- Initiated the company's internal JavaScript library project Elib-Core.
- Initiated and contributed to the internal HTML components (widgets) project on top of the internal library Elib-Core.
- Introduced assets and product build tools to the company.

2012-11-01 TILL 2013-02-01
